

OUR CLEANING PRODUCTS

ABOUT OUR PRODUCTS

At Upper Crust Cleaning Co., we care about our customers and the environment. Transparency is important to us, so we want to share with our clients the quality cleaning products we use in their homes.

Our staff are trained with a less is better approach, and we always do our best to use environmentally safe products as much as possible. Some of our cleaners are not green but are necessary to use on occasion to eliminate some types of harmful bacteria and spores.

We are continually evaluating new cleaners and products to bring our customers the best outcome possible with the least impact on our environment.

If there are products that may cause reactions or clients would like to incorporate products they like and keep on hand, we are happy to accommodate.

We also proudly use Shark® brand vacuum cleaners that are bagless and offer DuoClean technology. We maintain and prefer to use our vacuums whenever possible. We will use client's vacuums upon request considering they are in good working order. We will not maintain or troubleshoot problems on customer vacuums. We will require the use of a client vacuum if their pet has regular accidents.

Additionally, all cleaning rags, brooms, buckets and mops are provided as well, making our clients lives easier.

CLEANING PRODUCTS

 = Green/Earth-friendly product
